

## battery.case P908.8 | B&W battery transport case – Storing and transporting lithium batteries safely

### Description

- The ideal solution for the safe storage and transportation of intact and defective lithium batteries
- Robust and user-friendly in use thanks to the inner protective metal compartment.
- Unique safety system that closes automatically in the event of a fire inside, registered with the German Patent and Trade Mark Office
- High-quality plastic case with internal metal container
- The active carbon filter reduces escaping gases and reduces the formation of soot in the event of a battery fire
- Tested and approved as hazardous goods packaging and therefore suitable for the transportation of intact and defective lithium batteries on public roads
- Tested under real conditions: No flames escaped from the battery fire during the tests and the outer shells of the B&W battery.cases P908 remained constantly below 100°C
- The B&W battery.cases P908 are officially approved for the transportation and storage of intact and defective lithium batteries in accordance with the transportation regulations P903 and P908.

### Charging option in the case

Yes

### Payload (kg)

8

### Weight (kg)

10,5

### Inner dimensions depth (mm)

140

### Inner dimensions width (mm)

264

### Inner dimensions Length (mm)

388

### Outer dimensions depth (mm)

215

### Outer dimensions width (mm)

420

### Outer dimensions length (mm)

510
