

STARLINK.CASE

THE COMPLETE SOLUTION OF STARLINK INTERNET & MOBILE ENERGY

Ready to go for the satellite internet of the future: The starlink.case offers you perfect integration of the Starlink-Standard-Kit with motor including the required power supply.

All in one case: robust, waterproof, easy to transport and ready for immediate use.

38W
Cases of Success

registered at the
German Patent and
Trademark Office

The B&W solution integrates the Starlink-Standard-Kit with motor with a battery system, all necessary cables and a special antenna base.

Thanks to the integrated 1500Wh battery, the Starlink system is supplied with power and also provides a 230V connection and two USB charging ports. Thus, the system is immediately ready for use and can be operated completely self-sufficiently for more than 24 hours. Continuous operation is possible with the use of the separately available solar module.

The B&W starlink.case

- offers optimal protection for the Starlink-Standard-Kit with motor
- contains safe and durable LiFePO4 batteries, rechargeable via 230V (charger included), 12V (car), 24V (truck) as well as via solar panels (each sold separately)
- has a holder for the Ethernet adapter and offers a waterproof RJ45 connection as well as a waterproof screw connection for the antenna cable
- includes an antenna base with mounting sleeve as well as four magnetic feet and four ground spikes for additional mounting of the antenna base
- is easy to transport thanks to trolley function and carrying handles
- hardware and controls made in Germany

B&W starlink.case	
Battery capacity	1,500 Wh lithium iron phosphate battery with up to 5,000 charge cycles
Operating time	Min. 24 hrs. thanks to integrated rechargeable battery
